

# YOUR INFRASTRUCTURE & DEVELOPMENT CONTRACTOR

[www.tecrail.co.uk](http://www.tecrail.co.uk)

## Overview

Tec-rail & Infrastructure Directors and the senior management team have delivered a number of prestigious projects within Infrastructure and Building sectors. We undertake work throughout England & Wales delivering small to medium schemes as a Main or Sub-contractor for organisations operating within these industries delivering projects to allocated time frames and most importantly a safe manner.

## Our key sectors:

- Commercial
- Residential
- Refurbishment
- New Build
- Civil Engineering
- Highways
- Water
- Energy

## Previous clients include:-

## We will NEVER compromise on safety

Since our inception in 2013 we have continued to maintain an unblemished safety record, recording zero accidents (lost time incidents), that currently equates at week ending ( 11/06/2017 ) to 352,245 hours without incident. However, we will never take safety for granted, and employ constant vigilance and collective responsibility to ensure that our record continues to remain intact.

## Social, Economic and Environmental Sustainability

We always look to employ and train local labour wherever possible. This increases safety as it reduces travel time to site, minimal carbon footprint, and it also reduces the cost to client as it minimises the requirement for overnight and travel allowances. This also improves the quality of services delivered, as the workforce are often local stakeholders. Finally our policy usually results in a financial return for our client and the community we serve.

Our company believes in environmental sustainability and minimal requirement for removal of waste from site that is not recyclable. Recently we were able to demonstrate that 99% of demolition and site clearance waste was being recycled and reused on site.

## Investment in People & Skills

We provide our people with all the training required to deliver a wide range of services. Wherever possible we look to provide in-house training, however for specialist skills or long term training needs, we utilise our links with local technical colleges, universities, and accredited industry leading training providers.

It is a key policy of ours to continue to invest in key items of plant. This ensures

- (1) The client benefits from our “one-stop-shop” with no margin on margin addition for hired plant
- (2) Added surety of delivery, as we are not dependent upon third parties to deliver their plant on time to site,
- (3) Added safety, as all our people receive prior training on use of plant before going on site, so no unfamiliarity with different makes and types of plant.
